

TOPIC: Intro to ASP.NET MVC

Task 1:

Create a web application with pages of a specific artist biography. The app should contain the pages with general info, life history, picture collections, ect.

! Use the ASP.NET MVC technology to create the project.

*Task 2:

Create a list of the artist pictures (title, year, file path) and put it to the appropriate view. Use for loop to display the items in the view.

! – *important information*

* – *additional task*
